

The diagram shows a vertical axis on the left labeled "Tempo" (Time) with a downward arrow. In the center, a blue river flows downwards. Butterflies of various colors (red, orange, yellow, pink, purple) are scattered around the river. The number of butterflies of each color decreases from top to bottom, representing the process of natural selection over time.

On the right side, there are three empty rectangular boxes for notes:

- Box 1:
- Box 2:
- Box 3:
